

DJayRAIL

The DJayRAIL by DJayGEAR is the ultimate solution for events who want every DJ/act in the centre of the DJ booth.

With 2 sliding platforms on a rail you can put each set-up in the middle of the stage. You easily slide the platforms from left to right, and right to left. All the necessary infrastructure is build in. It's quick, clean, light weighted and very efficient!

The DJayRAIL comes in 2 variations. The EDM edition is made for the standard set-up: 4 players and 1 mixer. The TECHNO edition (co-developed with AWAKENINGS) is more versatile to meet the artist' set-up requirements. Both versions are extendable in rail tracks and platforms.

DJayRAIL EDM

2x Platform (1,97m x 0,82m)
2x Sunscreen
4x Rail track (2m x 0,7m)
2x LK37 + 2 UTP + Powercon (15m)
2x LK37 Pigtail
4x Neutrik UTP coupler
1x DJayGEAR Power Switch (optional)

DJayRAIL TECHNO

2x Platform (1,60m x 0,79m)
2x Sunscreen
4x Extention platform (0,60m x 0,79m)
2x Extention layer (0,83m wide)
4x Rail track (2m x 0,7m)
2x LK37 + Powercon (15m)
2x LK37 Pigtail
1x DJayGEAR Power Switch (optional)

Requirements

For an optimal installation of the DJayRAIL a few stage requirements have to be persued.

- Min. 6m wide DJ Booth without curves and decor/attributes for the EDM Rail, 8m for the TECHNO Rail. For both DJayRAILs 8m booth is preffered. Other width can be discussed in advance.
- Stagedeck at 80cm high ór 100cm with separate stagedeck for DJ's to stand on to compensate the height of the DJayRAIL.
- 2 Schuko power outlets in the centre of the DJ booth underneath the table, each on a different power group/source.
- 1 Stageblock with 12 XLR inputs in the centre of the DJ booth underneath the table.
